Peter Mugisha

QA Lead / SDET

Kampala, Uganda · open to roles in Nairobi and remote

mugipete1@gmail.com | linkedin.com/in/petermugisha | github.com/Elpharz | https://elpharz.github.io/

PROFESSIONAL SUMMARY

QA lead and SDET with about 8 years in quality work (including product-owner and QA work as co-founder of Quartz & Binary Synergy), with 5+ years in dedicated QA roles. Owns quality end to end across web, mobile and backend services, combining hands-on test automation with team leadership. As sole QA at Fair Ventures Digital, owned quality for the TREEO REST service, web frontend and mobile app from inception to open-source release, building CI/CD quality gates and automated regression, while leading the 10-person engineering team across Germany, the Czech Republic and Uganda for three years. At Old Mutual East Africa, owned release quality sign-off for financial-services applications across multiple African markets and implemented an Appium + BrowserStack mobile E2E framework. At Viamo, tested IVR, USSD and SMS services for a platform serving users across Africa, including on-site user acceptance testing in rural communities. Most recently Senior QA Engineer (Supervisor Level) at ADWrap, supervising a 3-person customer support team. A software engineering and product management background means reading the code under test and pushing for testable acceptance criteria early.

SKILLS

Quality strategy & leadership: Test strategy and test plans, risk-based testing, QA processes, playbooks and standards, defect triage and severity frameworks, acceptance criteria, release go/no-go sign-off

Test automation: Playwright, TypeScript, Selenium WebDriver, Cypress, Appium, BrowserStack, PyTest

API testing: REST APIs (Postman, REST Assured)

CI/CD & quality gates: Automated quality gates, regression suites in the release pipeline, GitHub Actions, Jenkins, Bitbucket Pipelines, Docker

Languages & data: Python, TypeScript, JavaScript, SQL (BigQuery)

Testing types: Functional, integration, regression and exploratory testing, UAT, offline and low-connectivity testing, IVR, USSD and SMS services

Security: Security testing (OWASP Top 10), pre-release security audits

Leadership: Led a 10-person engineering team for three years, supervised a 3-person customer support team, sprint planning and delivery, distributed teams across time zones

Tools: Jira, Xray, TestRail, ServiceNow, Git, Bitbucket, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior QA Engineer (Supervisor Level) | ADWrap (adwrap.app) | Jan 2026 – May 2026

- Owned QA and test automation, including test strategy and release sign-off.
- Supervised a 3-person customer support team.

Senior QA Engineer | Old Mutual East Africa (Contract via GoodInfo) | Nairobi, Kenya | Feb 2024 – Jun 2025

- Owned release quality sign-off for mission-critical financial-services applications across multiple African markets (South Africa, Ghana, Nigeria, East Africa), aligning regional releases with the group release train.
- Built Playwright (TypeScript) E2E and API tests.
- Evaluated and implemented an Appium + BrowserStack mobile E2E framework, cutting manual testing effort and accelerating release cycles.
- Built Jira + Xray test documentation standards, improving test-case visibility and traceability, and integrated ServiceNow defect management into the release workflow, speeding up bug resolution.
- Developed automated regression suites embedded in the release pipeline for mission-critical fintech applications.

Lead QA Engineer & Engineering Team Lead | Fairventures Worldwide gGmbH (Fair Ventures Digital) | Kampala, Uganda | Jan 2021 – Dec 2023

- Led the 10-person engineering team for three years across Germany, the Czech Republic and Uganda, owning sprint planning, delivery, cross-site coordination and release go/no-go decisions.

- As sole QA, owned quality end to end (test strategy, automation, CI/CD quality gates and release sign-off) for the REST service, web frontend and mobile app from inception to the open-source release in May 2022, steering the project through BMZ/GIZ compliance and quality requirements.
- Established end-to-end QA processes, playbooks and standards, documented so they held consistently across time zones.
- Built CI/CD pipelines with automated quality gates that kept under-tested code from reaching production, reducing deployment failures.
- Automated regression testing with Python, PyTest and Selenium and maintained high test coverage across platforms through bi-weekly sprints.
- Directed security audits ahead of the open-source release of the public repositories (github.com/fairventures-worldwide) and presented the release at Fairventures Worldwide headquarters in Stuttgart.

Quality Engineer (Part-time) | Viamo | Kampala, Uganda | Oct 2021 – Nov 2022

- Ran the biweekly release process for a platform serving users across Africa (IVR, USSD and SMS), shortening release cycles.
- Automated highly repetitive test cases and contributed to a Python-based automation framework, reducing testing time; built end-to-end web UI automation in Cypress.
- Integrated automated tests into Bitbucket Pipelines, validated data integrity with SQL queries in BigQuery, and managed test cases in TestRail for traceability.
- Designed offline and low-connectivity test strategies, ran on-site user acceptance testing in rural communities, and implemented automated IVR testing that reduced error rates.

Quality Engineer | awamo GmbH | Jan 2020 – Nov 2020

- Raised test coverage by introducing structured test plans and Selenium automation.
- Established defect triage and sprint-level QA processes within an Agile team, speeding up execution.

Co-founder & Software Engineer (Product Owner / QA) | Quartz & Binary Synergy | Kampala, Uganda | Jun 2015 – 2017

- Co-founded and part-owned the company; built web and mobile platforms with secure payment API integrations.
- Did the product-owner and QA work: acceptance criteria, pre-release testing and release decisions.

EARLIER EXPERIENCE

- Product Manager, Pixan Corporation (2017 – 2019): Led product roadmaps and go-to-market strategy; this product-side view now drives testable acceptance criteria and shift-left QA.

EDUCATION

BSc Software Engineering, Makerere University (2012–2017)

CERTIFICATIONS & TRAINING

- Software Testing Management (STV1.2x), USMx / University System of Maryland via edX, verified, 2020
- PMP Exam Prep Training (35 contact hours), Uganda Management Institute, 2025
